

Mosquito Nets and Ground Cloths for Ma-Ka-Ja-Wan

- A. Ground Cloth - 8' X 3' X ~ 4 to 6 mil

Each Scout needs a plastic ground cloth for under his bunk to prevent Mosquitoes from entering the Mosquito net thru the gaps between the boards in the tent platform. Readily available at the hardware store. Garbage bags or light weight "Saran Wrap" painters drop cloths will not work.

- B. Mosquito Net – 80" L X 34" W X 40" H

The dimensions are important to fit the cot. The Scout store stocks the correct size. Be careful about waiting until the last minute when the store stocks out.

- C. Dowels for Net - Qty 4 - 3/8" dia (or 7/16" dia) X 36" Lg

The dowels will be attached to the cot with Duct Tape (be sure to send a roll). Tennis balls (with a hole punched in them) are placed on top of the dowels to prevent them from tearing the net. Readily available at Home Depot, Menards, etc. Note the height is chosen so that the net lands on the floor to prevent entry of mosquitoes.

- D. Tennis Balls – Qty 4 – with punched hole - As indicated above.

- E. Duct Tape – Roll – As indicated above.
